Travellers 2

Schedule 9

Intelligence Hub

7. Wire up schedule to Plan > Schedule. Link schedule back to product assembly structure and routing.

[illegible]

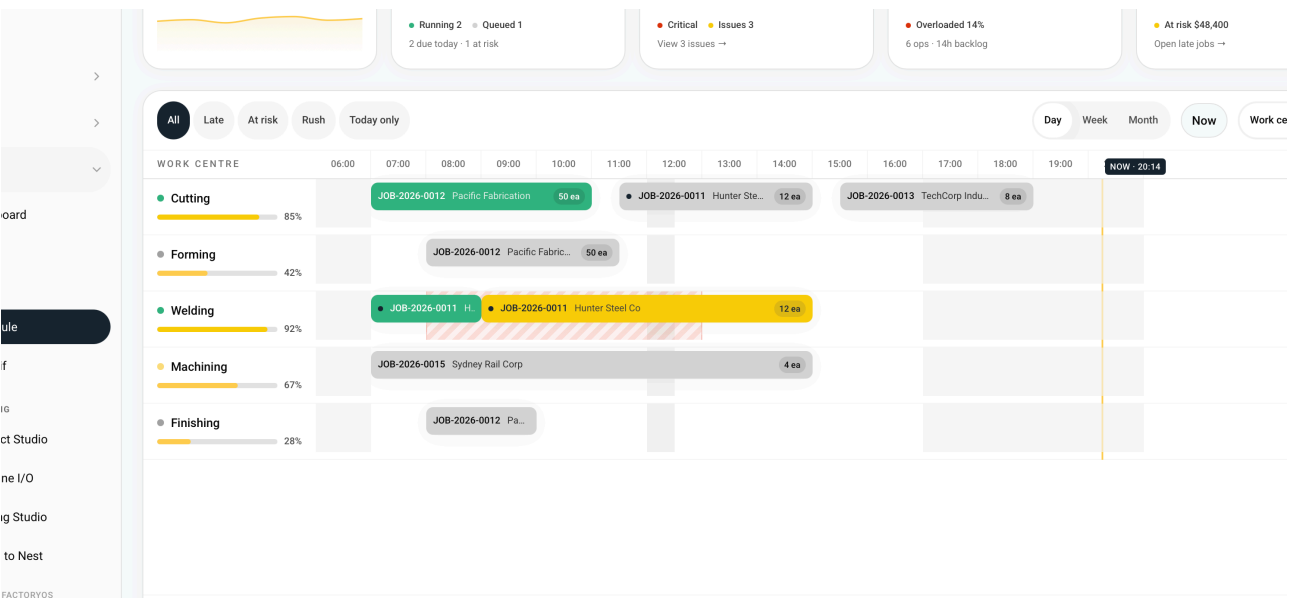

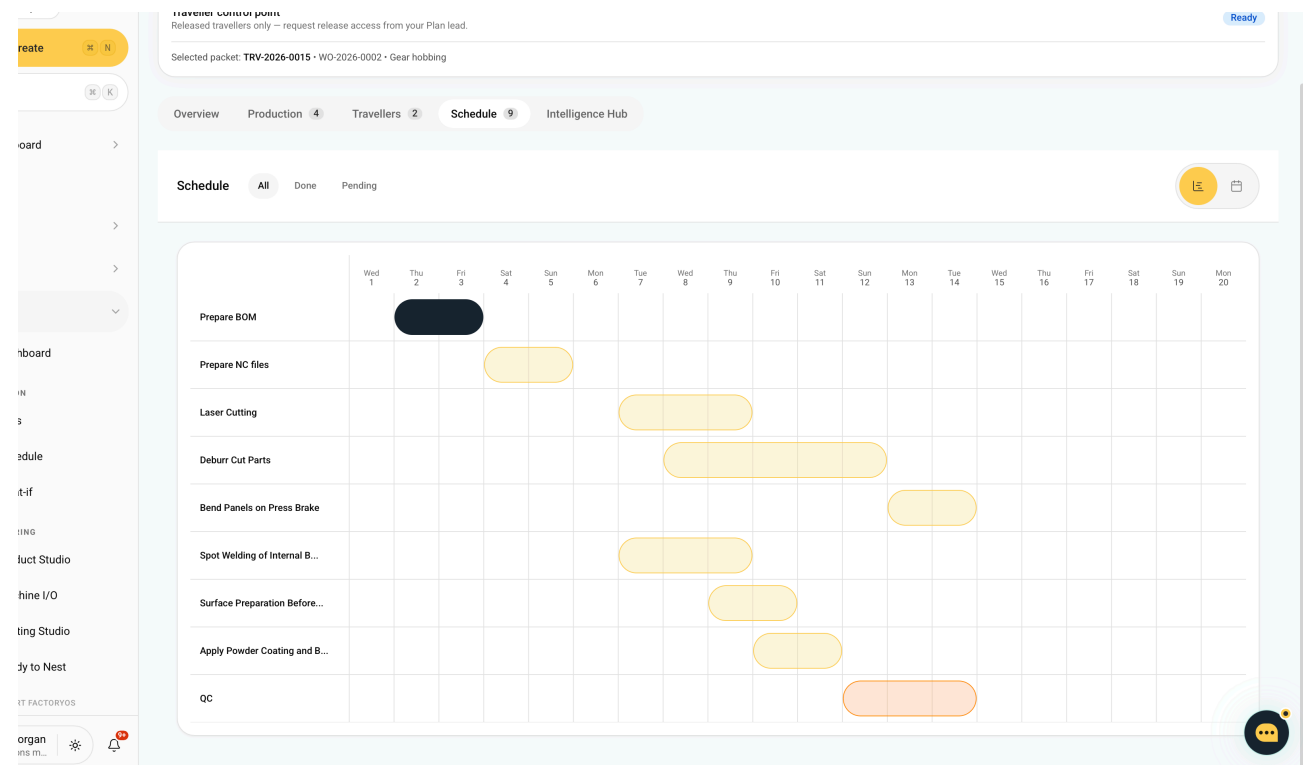

8. Move MirrorView from production to its own tab.

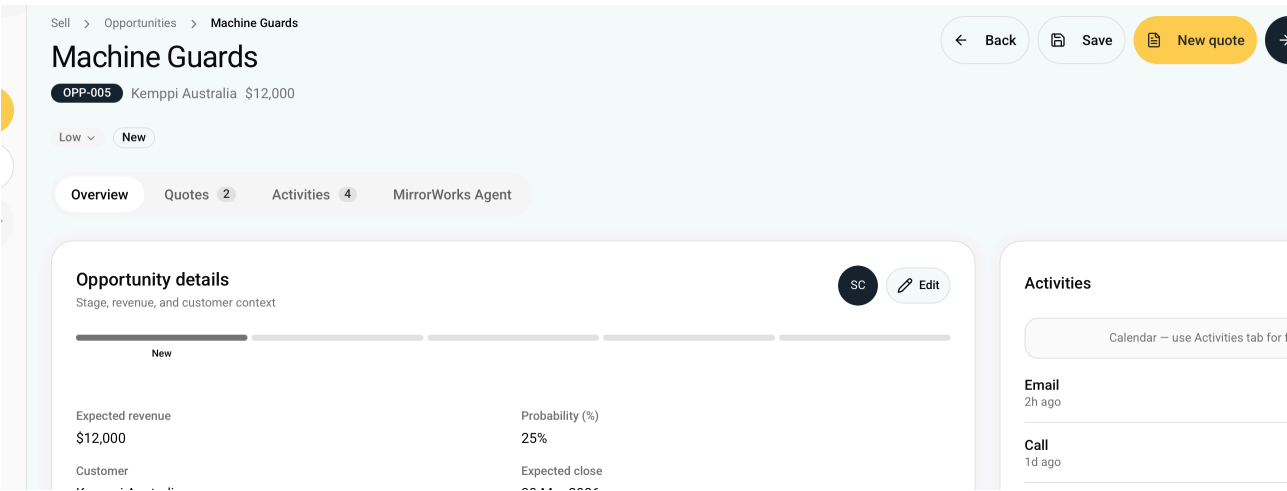

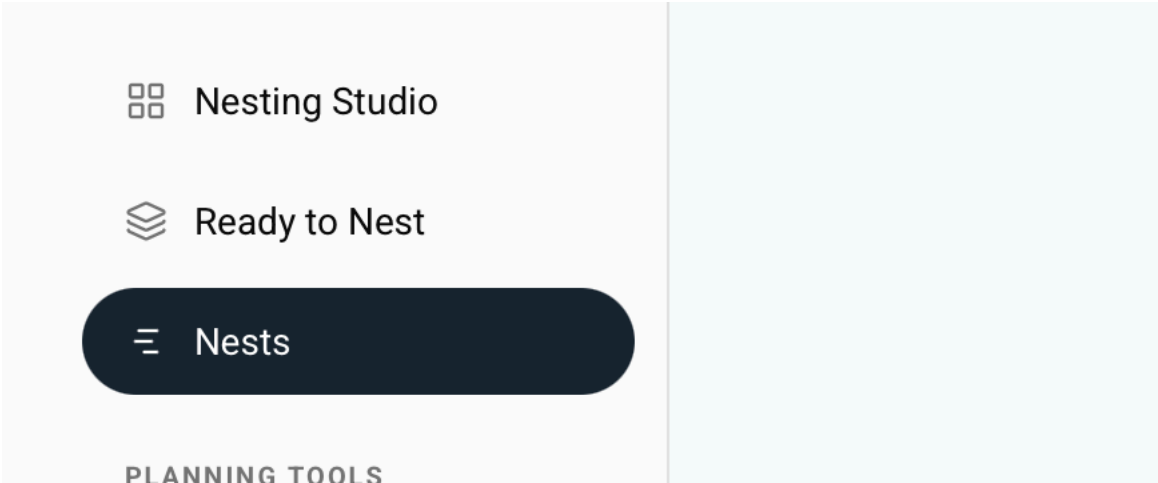

9. Should we add a print button to the traveller. Also add signatures, and production notes.
https://www.kevinmeyer.com/value_your_fell/

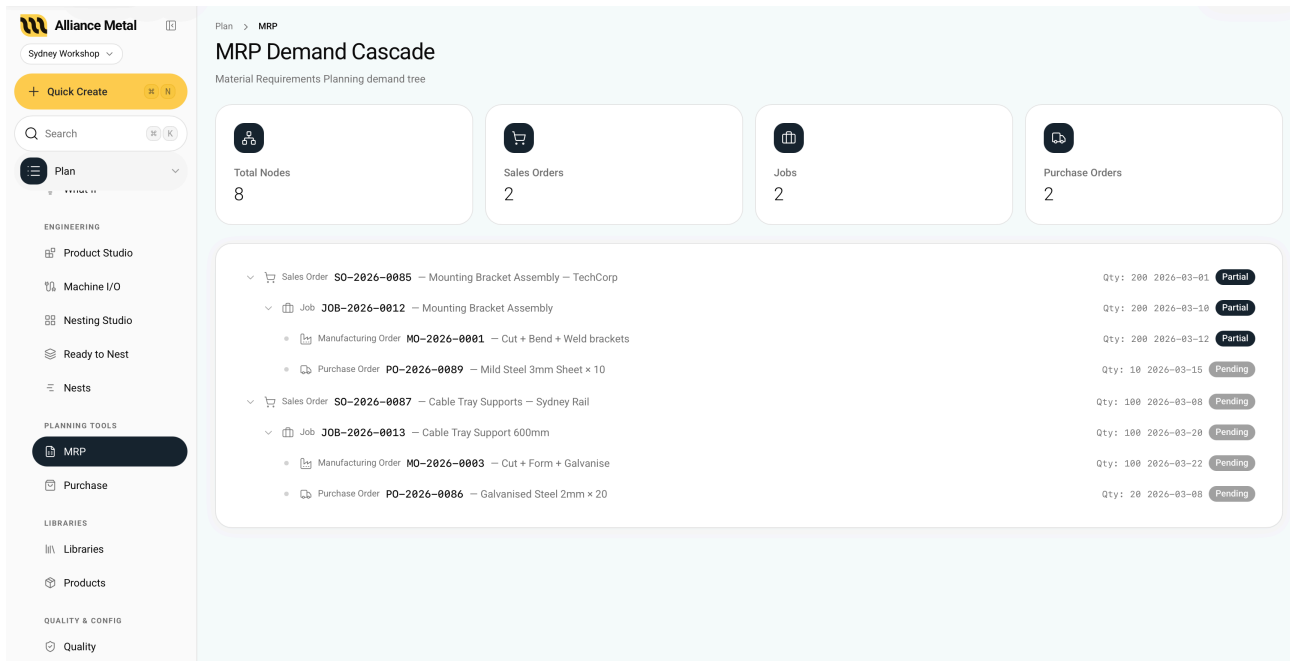

10. Make the schedule editable, and format as per the plan > schedule engine

11. We have machine I/O with nc connect, nesting studio, ready to nest, and nests. All separate pages/screens within the one module. I think this is confusing as to their functions and we should consolidate into a single screen following our standard tab pattern, if indeed all screens are viable and have a unique and important feature. Brainstorm ideas and MVP viability of each screen.

12. What is the function of the MRP demand cascade? A read only table. No move to promote to RFQ? Brainstorm ideas here because it'd be great to see impact that jobs have on MRP.

12. Again, could MRP and purchase planning be on one screen (tabbed if needed).

13. Products to follow any changes made in sell > products. And erp wide.
